

# BRIDGING CONNECTIONS

## Fetal Alcohol Spectrum Disorder Program

Fetal Alcohol Spectrum Disorder (FASD) is a lifelong disability that impacts everyone differently. Each person has unique strengths and challenges and may need lifelong supports to succeed.

The Bridging Connections program walks alongside Métis families, connecting them to support networks, culture, resources, and community by:

- ∞ Providing supports and advocacy before, during, and after assessment
- ∞ Linking Métis Albertans with cultural supports and resources
- ∞ Connecting individuals to FASD Networks, resources, and information
- ∞ Supporting the navigation of community resources and systems
- ∞ Informing and supporting the MNA citizenship process
- ∞ Offering cultural training to professionals who work with the Métis community

*Let's cross this bridge together.*
